

Palliative Care Training

All volunteers are required to complete the Palliative Care Training Program that's offered by Hospice Palliative Care Ontario (HPCO). Modules will be completed online at your own pace.

Our program prepares volunteers with the tools and education to provide the best care possible to our residents and families.

The training covers such topics as

- Role of the Volunteer
- What is Palliative Care
- Effective Communication Skills
- Understanding the Dying Process
- Grief and Bereavement
- Psychosocial Issues and Impact of Illness

We provide volunteer training for the volunteer team specific to the role you wish to fulfill. A shorter, tailored training program is provided for volunteers who do not wish to work directly with our residents and families (i.e. gardeners, maintenance, fundraising, etc). All volunteers must undergo a criminal record check.
